

Why the **KRONOSync** Clock System from **Franklin Wireless** is the correct choice for providing ***Accurate, Reliable Synchronized Time*** throughout all types of facilities.

1. Enhanced technological design and sophistication packed into a small, light and durable unit, requiring very limited space.
2. Easy to use feature functionality, allowing quick, simple “**Plug and Play**” set up and operation.
3. Many competing wireless clock systems require time consuming and complicated external installations necessary in providing proper facility coverage. The **KRONOSync** system does not!!! All without compromising the power and transmitted signal strength needed to ensure reliable building penetration and accurate time synchronization.
4. No outside roof mounted antenna is necessary, saving time and money.
5. Our **467MHz Ultra High Frequency** (UHF) is optimal for the type of signaling necessary to provide consistent, reliable transmission that easily penetrates various building materials such as metal, steel and concrete throughout your facility.
6. All this, at an affordable cost that is lower than other existing systems.
